## Project Design Phase-II Solution Requirements (Functional & Non-functional)

Date	03 October 2022
Team ID	PNT9217 2019102306
Project Name	Project – IOT-Based Safety Gadget for child safety Monitoring and Notification
Maximum Marks	4 Marks

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Authentication	Only the authorized people for that product will know the ensures security.
FR-4	User Interface	The monitor able to see the location of child when they are out of geofence will also track the exact information about the children.
FR-5	Notification	Notified through mobile and mail.
FR-6	Identification	Child can be identified by it's exact location through GPS.

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	We can access child location through mobile application. It is portable and comfortable to use.
NFR-2	Security	Database security and the safety of the product while in use.
NFR-3	Reliability	It creates a good environment for users to use. Once logged in the webpage will available until the log out.

NFR-4	Performance	A notification must sent immediately if seen a change in the child's location. Database needs to be updated every seconds.
NFR-5	Availability	The data will be available whenever needed.
NFR-6	Scalability	The process must be flexible to use at anytime.
